

- **Metering with smallest possible rate capability**
- **High reproducibility**
- **High metering accuracy even with degassing products**
- **Self-priming and self-venting with smallest metering volumes**
- **Mechanical stroke adjustment**
- **Stroke frequency regulation**
- **Pulse control**
- **Pulse multiplication and division**
- **Pulse storage**
- **Standard signal drive**
- **Empty signal report and level pre-warning**
- **External metering lock**
- **Empty signal and stroke signal output**
- **Metering regulator (readjustment of metering output) in combination with an oval gear meter**

All metering pumps of the series ELADOS® EMP-KKS operate on the piston-diaphragm principle. The diaphragm serves to feed the product whereas the piston handles the metering. Because of the continuous surplus return this metering pump operates self-venting. Therefore, the pump is appropriate for the conveying of degassing products. The cylindrical piston system without seal

is made of ceramic material and offers maximum resistance to chemicals. Different electronic control variants allow the pump to be adapted to any process for quantity or proportional metering. The reasonable choice of accessories completes the extent of supply and represents a complete program for the metering application.

* For the connection of PE or PTFE hoses (2/4 mm) with the 0.5 l/h version is optional an angled connection ([247613](#)) available.

If metering units with EMP KKS pumps 0.2 and 0.5 l/h are operated with a very low metering rate or in combination with the monitoring system **micro flow**, the metering line should be carried out with 2/4 mm hoses.

Electrical versions

E 10 On / off switch, mechanical stroke adjustment

- E 60**
- Mechanical stroke adjustment
 - Back-lit graphic display, 4 operating keys
 - Single stroke control (each stroke is completely executed)
 - Metering monitoring via stroke-signal output or via external metering-monitoring system (e.g. liquid level switch) possible
 - Registration of operating and consumption data (calculative)
 - Calibration function

Selectable operating modes:

Internal mode

Selection of metering rate/metering frequency via:

- Strokes/min
- Percent
- Liter/h (or gallon/h)

External mode

- Pulse mode (actuation via pulses)
 - Pulse multiplication (one incoming pulse = n metering strokes)
 - Pulse division (n incoming pulses = 1 metering stroke)
- Standard signal mode (actuation via external standard signal 0/4-20mA or 20-0/4mA)
- Charge mode (a previously selected quantity is metered, with initiation via an external initiation pulse)

Inputs:

- Level monitoring, package vessel (reserve and empty signal)
- Pulse
- Standard signal
- Enable (metering interlock)
- Metering control

Outputs:

- Level monitoring package vessel / malfunction
- Stroke signal
